

1 **Make it attractive to come to the SPiN common room:**

2 In the academic year of 2021-2022, the SPiN room was officially reopened after the relocation to
3 the Maria Montessori building. Since then, the XIVth and XVth boards have strived to make the
4 new SPiN common room known among members again, and to create an open and welcoming
5 space for psychology students. However, the XVth board has noticed that the room is mainly
6 visited by the same students, which are often former board members or students who have been
7 active within SPiN for an extended amount of time. Furthermore, the XVth board has heard from
8 students that there is a threshold to visit the SPiN common room if students do not know the
9 board well, and if there is not a specific reason to visit the common room (e.g., theme days).
10 Nevertheless, the XVth board wishes for the SPiN room to be a welcoming place for all students,
11 where students can openly associate with one another, and the board. The XVth board believes
12 that this would add to the positive atmosphere within the association and the well-being of
13 students, as moments of rest in between classes and frequent communication with other students
14 are of significant importance for mental health. Therefore, the board would like to get your input
15 and ideas on the following questions:

- 16 • What attracts you to come to the SPiN common room? What keeps you from
17 visiting the room?
- 18 • What do you think would help reduce the threshold to come to the SPiN common
19 room?
- 20 • What would make the SPiN common room more attractive and welcoming?
